EDUCATION:

ATLAS TECHNOLOGY SCHOOL — Tulsa, Oklahoma

Full-Stack Software Development Program | Expected Graduation: December 2026

- Completed intensive and accelerated full stack software development training focused on JavaScript, TypeScript, React, Node.js, Express, Next.js, REST APIs, databases, testing, Docker, AWS, and CI/CD
- Developed and deployed full-stack applications using modern frontend, backend, database, cloud, and software development practices

RELEVANT EXPERIENCE:

SELF EMPLOYED BARBER — Tulsa, Oklahoma | December 2022 – Present

- Manage an independent barber business serving a consistent client base while handling scheduling, customer relationships, payments, and business operations
- Built digital marketing and search engine optimization strategies to increase online visibility for barber services in the Tulsa area
- Manage business finances, booth rent, operating expenses, and customer retention

TECHNICAL PROJECTS:

TASK MANAGEMENT API — Full-Stack Developer | May 2026

GitHub: [task-management-api-project-requirements-Chris-tech29](https://github.com/task-management-api-project-requirements-Chris-tech29)

- Built a RESTful task management API using TypeScript, Express, Prisma, PostgreSQL, Redis, JWT authentication, and Winston logging
- Implemented user authentication, role based authorization, protected routes, and complete CRUD functionality for tasks
- Created automated Jest tests for authentication and task functionality with successful test execution across multiple test suites

FULL-STACK CAFE POS — Full-Stack Developer | January 2026

GitHub: [cs1400-assignment-building-a-full-stack-cafe-pos-system-Chris-tech29](https://github.com/cs1400-assignment-building-a-full-stack-cafe-pos-system-Chris-tech29)

- Developed a full-stack point-of-sale application for managing cafe products, orders, and business operations
- Implemented frontend and backend functionality using modern JavaScript and full-stack development practices
- Applied database integration and API development concepts to create a functional business application

GROUPLIT — Full-Stack Developer | February 2026

GitHub: [Creating-a-group-management-app](https://github.com/Creating-a-group-management-app)

- Collaborated on a full-stack application designed to help users organize and manage group activities
- Developed application features using React, TypeScript, APIs, and database technologies
- Applied collaborative Git workflows and software development practices throughout the project

PERSONAL PORTFOLIO WEBSITE — Full-Stack Developer | November 2025

Live Site: <https://chris-tech29.github.io/Portfolio-Website/> | GitHub:

<https://github.com/Chris-tech29/Portfolio-Website>

- Designed and deployed a responsive portfolio website to showcase software development projects and technical experience
- Utilized React, TypeScript, Tailwind CSS, AWS S3, CloudFront, and infrastructure deployment tools
- Configured cloud hosting and deployment workflows to make the application publicly accessible

SKILLS:

Languages: JavaScript, TypeScript, SQL, Python

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express, REST APIs

Databases: PostgreSQL, MySQL, Prisma

Tools & Cloud: Git, GitHub, Docker, AWS, S3, CloudFront, RDS, Elastic Beanstalk, Pulumi

Testing & Development: Jest, Vitest, React Query, Zustand, MSW, CI/CD
